Speech delivery and contrastive acoustic evidence

reagan_challenger_1986-opening-monotone.wav

Analysis: 0e7e5833-01f6-4beb-8d12-c1838af4965c | 2026-10-14T17:13:30 UTC
Provider: evaluator / 3.1.3-local.1 | REAL
Rubric: Complete delivery with clarity / version 1

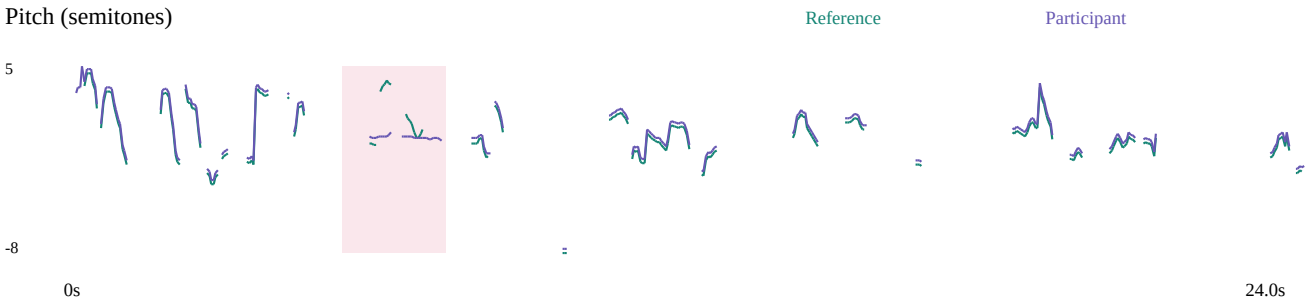
Overall delivery score: 99.2 / 100

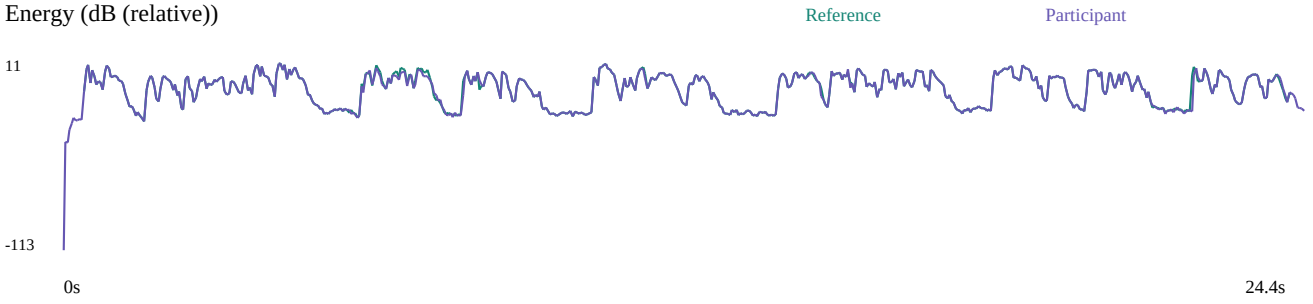
Dimension	Score / 100
Pacing	100.0
Pausing	100.0
Pitch	95.9
Energy	100.0
Clarity	100.0

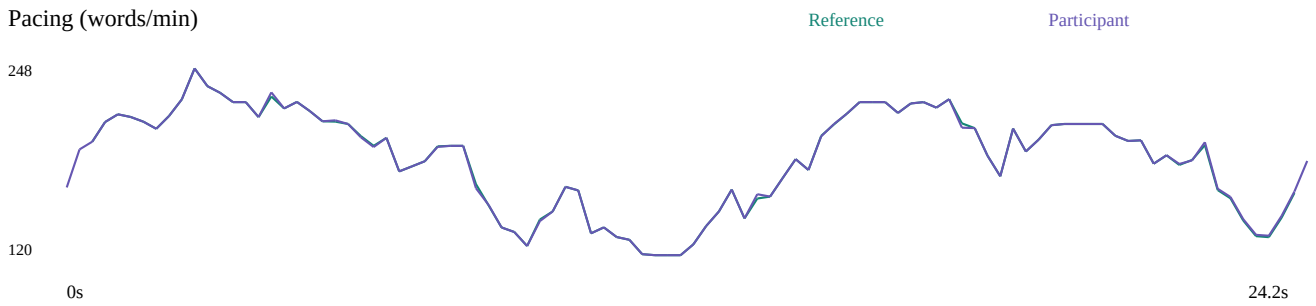
Clarity evidence

Clarity is reference-relative ASR word recoverability. It is not a calibrated human intelligibility or accent score; recording conditions and model bias can affect it.

Reference word errors: 23.0%. Participant word errors: 6.8%. Additional errors: 0.0 percentage points. Score = 100 x (1 - additional error rate), bounded to 0-100.
Independently recognized participant words: Ladies and gentlemen, I'd plan to speak to you tonight to report on the State of the Union But the events of earlier today have led me to change those plans Today is a day from morning and remembering Nancy and I are paying to the core of the tragedy of the shuttle Challenger We know we share this pain with all of the people of our country This is truly a national loss







Flagged delivery regions (1)

1. Monotone delivery | 5.38-7.38s | severity 4/5

In the corresponding passage, participant pitch interquartile range is 0.10 semitones; reference is 3.15 semitones. Difference: -3.05 semitones. Detection threshold: 1.26 semitones.

Practice: Vary pitch on the important words in this passage.

Passage: but the events of earlier today have
pitch_interquartile_range: reference 3.1, participant 0.1, difference -3.0 semitones. Evidence: measured.

Measurement notes

Detection confidence is heuristic, not a calibrated probability.
Clarity is reference-relative ASR recoverability, not a calibrated human intelligibility or accent score. Recognition errors may reflect recording conditions or model bias.
Scores use evaluator.py's heuristic deductions and the selected website rubric. Pacing and pausing are scored separately. Clarity measures additional ASR word errors relative to the reference.
