Speech delivery and contrastive acoustic evidence

reagan_challenger_1986-opening-low-energy.wav

Analysis: 3405a7ae-a974-4d1b-a885-7fb5f76727c8 | 2026-10-14T17:13:30 UTC
Provider: evaluator / 3.1.3-local.1 | REAL
Rubric: Complete delivery with clarity / version 1

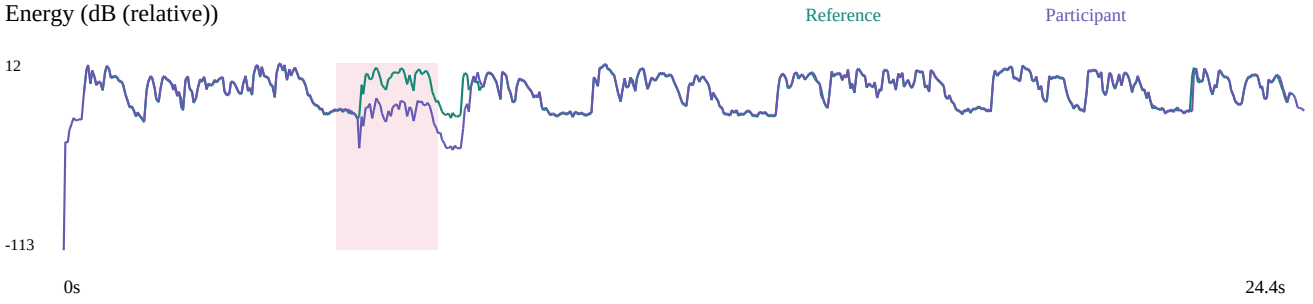
Overall delivery score: 99.5 / 100

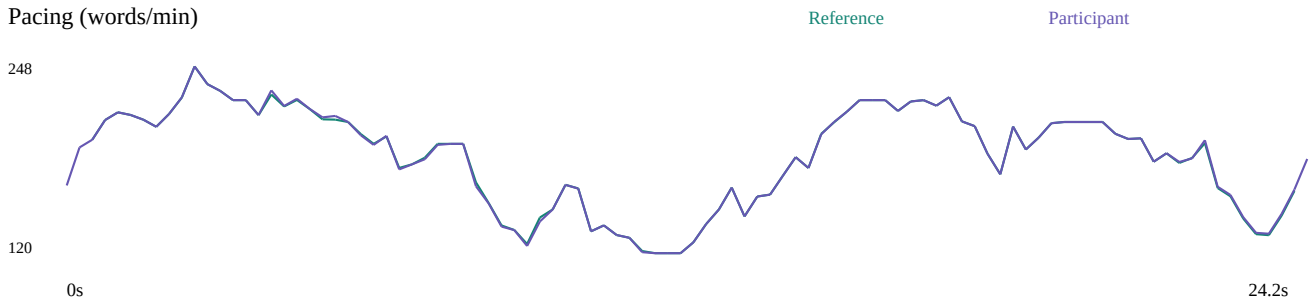
Dimension	Score / 100
Pacing	100.0
Pausing	100.0
Pitch	100.0
Energy	97.3
Clarity	100.0

Clarity evidence

Clarity is reference-relative ASR word recoverability. It is not a calibrated human intelligibility or accent score; recording conditions and model bias can affect it.

Reference word errors: 23.0%. Participant word errors: 18.9%. Additional errors: 0.0 percentage points. Score = 100 x (1 - additional error rate), bounded to 0-100.
Independently recognized participant words: Ladies and gentlemen, I'd plan to speak to you tonight to report on the State of the Union to change those plans. Today is a day from morning and remembering. Nancy and I are paying to the core but the tragedy of the shuttle challenger. We know we share this pain with all of the people of our country. This is truly a national loss.





Flagged delivery regions (1)

1. Low energy | 5.38-7.38s | severity 4/5

In the corresponding passage, participant speech energy db is -18.76 dB; reference is 2.16 dB. Difference: -20.91 dB. Detection threshold: -9.84 dB.

Practice: Sustain projection and breath support across these words.

Passage: but the events of earlier today have
speech_energy_db: reference 2.2, participant -18.8, difference -20.9 dB. Evidence: measured.

Measurement notes

Detection confidence is heuristic, not a calibrated probability.
Clarity is reference-relative ASR recoverability, not a calibrated human intelligibility or accent score. Recognition errors may reflect recording conditions or model bias.
Scores use evaluator.py's heuristic deductions and the selected website rubric. Pacing and pausing are scored separately. Clarity measures additional ASR word errors relative to the reference.
