Speech delivery and contrastive acoustic evidence

reagan_challenger_1986-opening-pause.wav

Analysis: 84b0cc1b-4a8b-4471-9e1b-10f7e1fe76a2 | 2026-10-14T17:13:30 UTC
Provider: evaluator / 3.1.3-local.1 | REAL
Rubric: Complete delivery with clarity / version 1

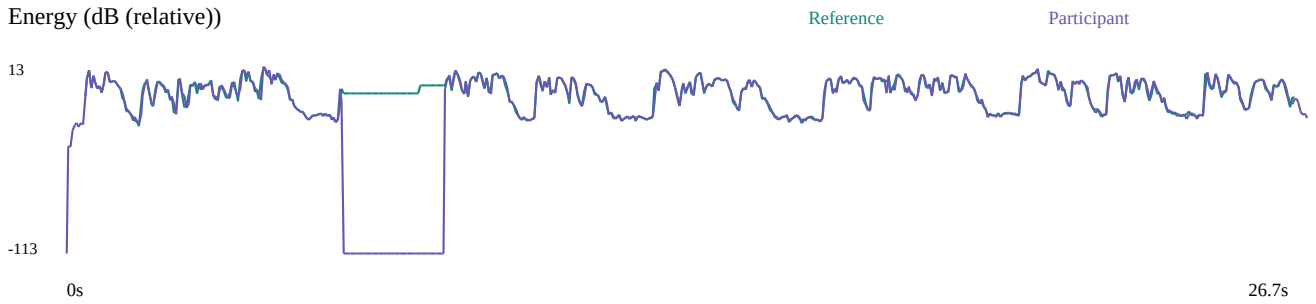
Overall delivery score: 99.7 / 100

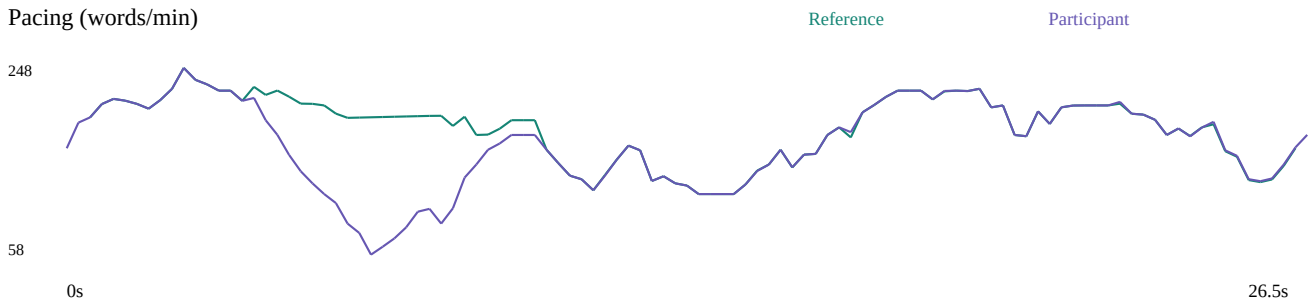
Dimension	Score / 100
Pacing	100.0
Pausing	97.9
Pitch	100.0
Energy	100.0
Clarity	100.0

Clarity evidence

Clarity is reference-relative ASR word recoverability. It is not a calibrated human intelligibility or accent score; recording conditions and model bias can affect it.

Reference word errors: 23.0%. Participant word errors: 9.5%. Additional errors: 0.0 percentage points. Score = 100 x (1 - additional error rate), bounded to 0-100.
Independently recognized participant words: Ladies and gentlemen, I'd plan to speak to you tonight to report on the State of the Union, but the events of earlier today have led me to change those plans. Today is a day from morning and remembering. Nancy and I are a pain to the core but the tragedy of the shuttle challenger. We know we share this pain with all of the people of our country. This is truly a national additional loss.





Flagged delivery regions (1)

1. Awkward pause | 5.92-8.13s | severity 2/5

In the corresponding passage, participant pause duration is 2.20 seconds; reference is 0.02 seconds. Difference: +2.18 seconds. Detection threshold: 1.50 seconds.

Practice: Connect these words smoothly while retaining intentional sentence pauses.

pause_duration: reference 0.0, participant 2.2, difference 2.2 seconds. Evidence: measured.

Measurement notes

Detection confidence is heuristic, not a calibrated probability.
Clarity is reference-relative ASR recoverability, not a calibrated human intelligibility or accent score. Recognition errors may reflect recording conditions or model bias.
Scores use evaluator.py's heuristic deductions and the selected website rubric. Pacing and pausing are scored separately. Clarity measures additional ASR word errors relative to the reference.
