Speech delivery and contrastive acoustic evidence

reagan_challenger_1986-opening-slow.wav

Analysis: fa2eb5cb-bba5-4990-ae2a-c7ef26a8757f | 2026-10-14T17:13:30 UTC
Provider: evaluator / 3.1.3-local.1 | REAL
Rubric: Complete delivery with clarity / version 1

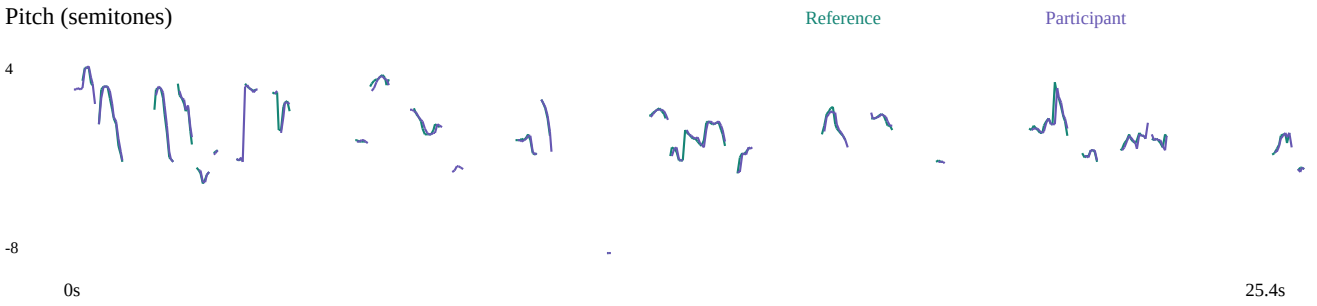
Overall delivery score: 98.8 / 100

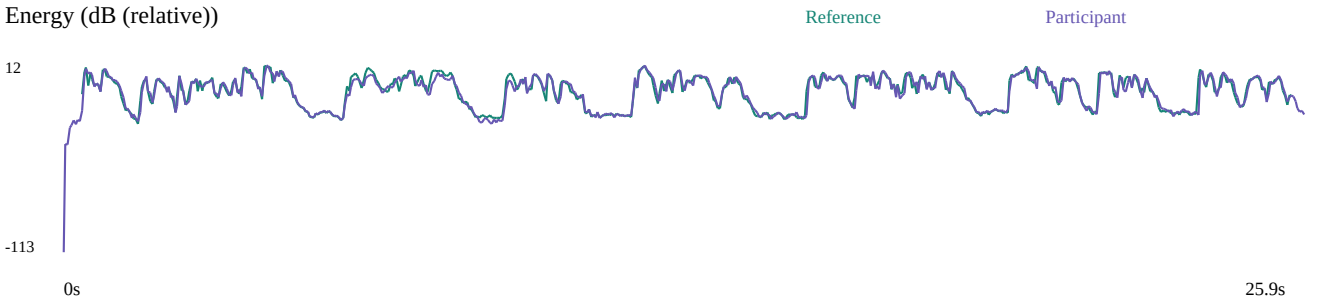
Dimension	Score / 100
Pacing	95.2
Pausing	100.0
Pitch	100.0
Energy	100.0
Clarity	100.0

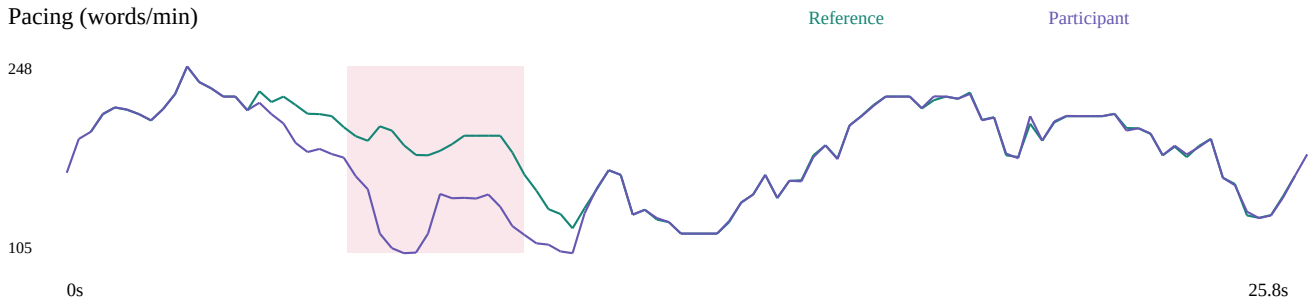
Clarity evidence

Clarity is reference-relative ASR word recoverability. It is not a calibrated human intelligibility or accent score; recording conditions and model bias can affect it.

Reference word errors: 23.0%. Participant word errors: 12.2%. Additional errors: 0.0 percentage points. Score = 100 x (1 - additional error rate), bounded to 0-100.
Independently recognized participant words: Ladies and gentlemen, I'd plan to speak to you tonight to report on the State of the Union. The events of earlier today have been to change those plans. Today is a day from morning and remembering. Nancy and I are paying to the Corps, but the tragedy of the Shuttle Challenger. We know we share this pain with all of the people of our country. This is truly a national loss.







Flagged delivery regions (1)

1. Slow pacing | 5.82-9.48s | severity 3/5

Matched articulation rate is 244.9 words/min versus reference 368.9 words/min, a -33.6% difference. Long pauses are evaluated separately.

Practice: Build momentum through this phrase.

Passage: but the events of earlier today have led
phrase_articulation_rate: reference 368.9, participant 244.9, difference -124.1 words/min. Evidence: measured.

Measurement notes

Detection confidence is heuristic, not a calibrated probability.
Clarity is reference-relative ASR recoverability, not a calibrated human intelligibility or accent score. Recognition errors may reflect recording conditions or model bias.
Scores use evaluator.py's heuristic deductions and the selected website rubric. Pacing and pausing are scored separately. Clarity measures additional ASR word errors relative to the reference.
