Analysis: 4a561763-5b9c-41ce-9d98-512b01e6b727 | 2026-10-14T06:10:13 UTC
Provider: evaluator / 3.1.0-local.1 | REAL
Rubric: Complete delivery with clarity / version 1

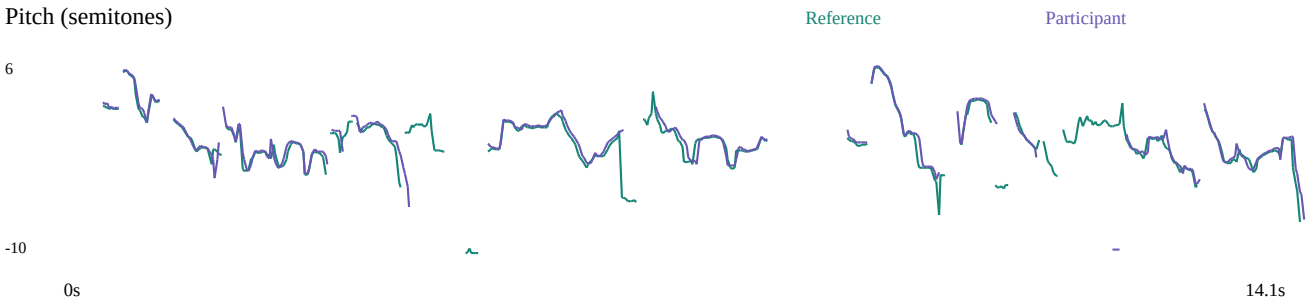
Overall delivery score: 95.3 / 100

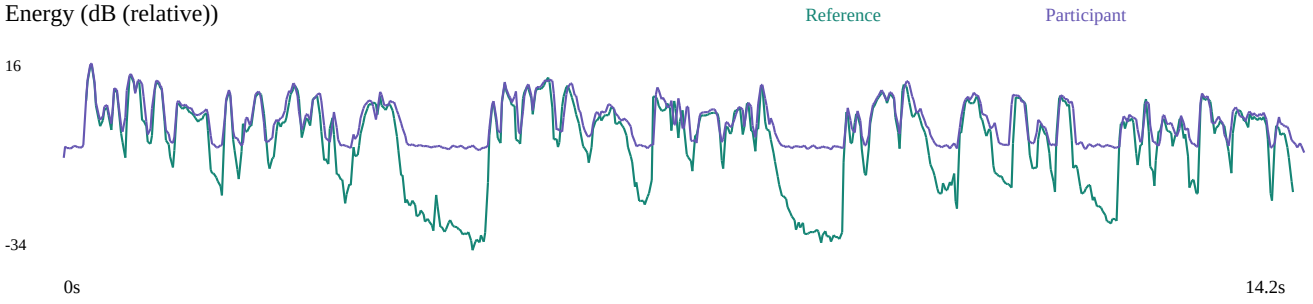
Dimension	Score / 100
Pacing	94.4
Pausing	100.0
Pitch	100.0
Energy	100.0
Clarity	83.6

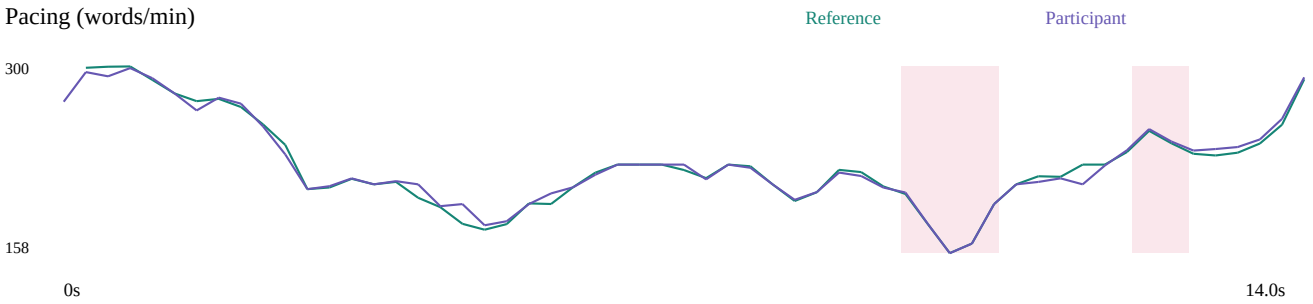
Clarity evidence

Clarity is reference-relative ASR word recoverability. It is not a calibrated human intelligibility or accent score; recording conditions and model bias can affect it.

Reference word errors: 0.0%. Participant word errors: 16.4%. Additional errors: 16.4 percentage points. Score = 100 x (1 - additional error rate), bounded to 0-100.
Independently recognized participant words: This is the 34th time I'll speak to you from the Oval Office and the last. We've been together eight years now and it's two years of the time for me to go. But before I do, I want to share some thoughts on the which I've been saving for a long time.







Flagged delivery regions (4)

1. Recognition difficulty | 6.71-7.75s | severity 5/5

The recognizer made 100% word errors in this phrase versus 0% in the reference. This can reflect pronunciation, recording conditions, or model bias; it does not establish a specific cause.

Practice: Listen to this phrase and check the recognized words. If unclear, articulate the word endings and record again in a quieter setting with a steady microphone position.

Passage: soon it'll be time for me
phrase_word_error_rate: reference 0.0, participant 100.0, difference 100.0 % word errors. Evidence: measured.

2. Rushed pacing | 9.45-10.55s | severity 4/5

In the corresponding passage, participant phrase articulation rate is 855.92 words/min; reference is 544.59 words/min. Difference: +311.33 words/min. Detection threshold: 707.96 words/min.

Practice: Leave room for emphasis and slow this phrase.

Passage: I do, I wanted
phrase_articulation_rate: reference 544.6, participant 855.9, difference 311.3 words/min. Evidence: measured.

3. Rushed pacing | 12.06-12.70s | severity 2/5

In the corresponding passage, participant phrase articulation rate is 599.25 words/min; reference is 460.74 words/min. Difference: +138.51 words/min. Detection threshold: 598.96 words/min.

Practice: Leave room for emphasis and slow this phrase.

Passage: some of which I've
phrase_articulation_rate: reference 460.7, participant 599.3, difference 138.5 words/min. Evidence: measured.

4. Recognition difficulty | 12.06-13.30s | severity 2/5

The recognizer made 29% word errors in this phrase versus 0% in the reference. This can reflect pronunciation, recording conditions, or model bias; it does not establish a specific cause.

Practice: Listen to this phrase and check the recognized words. If unclear, articulate the word endings and record again in a quieter setting with a steady microphone position.

Passage: some of which I've been saving
phrase_word_error_rate: reference 0.0, participant 28.6, difference 28.6 % word errors. Evidence: measured.

Measurement notes

Detection confidence is heuristic, not a calibrated probability.
Clarity is reference-relative ASR recoverability, not a calibrated human intelligibility or accent score. Recognition errors may reflect recording conditions or model bias.
Scores use evaluator.py's heuristic deductions and the selected website rubric. Pacing and pausing are scored separately. Clarity measures additional ASR word errors relative to the reference.
